

Felts Field Master Plan

Project No. 16-30-9999-031

Request for Qualifications Informational Meeting

MEETING DATE: 01/10/17
DATE ISSUED: 01/19/17

ATTACHMENTS

None.

QUESTIONS

1. Q: What are you envisioning when you say the Historical District Gateway Study will be incorporated into the Master Plan? Line work?
A: *Yes. Access, land acquisition, and other recommended improvements that result from the study will need to be captured in the Master Plan document. In addition, if the study identifies different access points from landside to airside, we'll need to include any improvements associated to access on the airfield.*
2. Q: What is the timeline for completion of the Historical District Gateway Study?
A: *An RFQ will go out for this work by February and we anticipate it will be about a year, as it will include agency and community participation.*
3. Q: Will the length of R/W 4L-22R extension be 750 feet or TBD?
A: *This will need to be analyzed and a determination will be made based on forecast needs.*
4. Q: How many rotary wing and float plane aircraft are based at the airport?
A: *While we currently show 14 based helicopters, we do not know the most recent number of based aircraft for float plane use. Both will need to be verified within the new Master Plan.*
5. Q: What is the FAA Grant approval timeframe?
A: *This is anticipated around March or April, following the consultant selection and negotiation period.*
6. Q: Is the City of Spokane still considering a pedestrian/bike trail?
A: *Yes. This will need to be shown in our Master Plan/Airport Layout Plans.*
